

Subject: Test Update - Slams Track Walkthrough, Intern Documentation & Admin Portal UI Testing

Date: December 10, 2025

Dear Cinda,

Here is our daily update on the testing activities.

1. Slams Track Walkthrough (Completed)

We have successfully completed the walkthrough for the **Slams Track** module.

- **Status:** The walkthrough is finished, and the detailed report on our findings has been submitted.

2. Intern Project Task Documentation (Completed)

We have completed the **task documentation** for the intern project.

- **Scope:** This covers instructions and guidelines for both the **Attendance App** and the **Admin Portal**.
- **Next Steps:** We need to **schedule a verification session** to review the documents. This is necessary to correct any formatting issues and ensure the structure is proper before the interns begin using them.

3. Ongoing: Admin Portal UI & Workflow Testing

We have shifted our testing focus to the **User Interface (UI) and workflow validation of the Admin Portal**.

- **Focus:** We are currently performing UI testing and checking the core administrative workflows and the logic build structure to ensure the application flows function correctly on the backend management side.

Best regards,
